## **Edisun Power Group: Ad Hoc Press Release**

### **Edisun Power appoints CTO as member of Executive Board**

**Edisun Power Europe AG enhances the Executive Board's technical know-how with the appointment of Markus Kohler as CTO. Mirjana Blume, CEO of Edisun Power, has this to say about the professional engineer: "Markus Kohler is a proven expert with many years of experience in the solar power sector."**

Markus Kohler was on the staff of Multi-Contact, a Swiss company specializing in contacts for solar modules, for 11 years. The 37-year-old engineer also holds a Master of Advanced Studies in Business Engineering from the University of Applied Sciences Northwestern Switzerland.

"In view of our company's rapid growth," says Mirjana Blume, "we are delighted to enhance the technology side of our Executive Board beginning on 1 April." The solar power producer favours streamlined structures: as of May, Blume will add the function of CFO to her present position as CEO, and will be able to rely on a professional finance division for support.

#### **The Edisun Power Group**

Europe's first listed solar power producer, the Edisun Power Group develops, finances and operates solar power plants in various European countries. The Group has been active in the Swiss solar power industry since 1997 and is today among the most successful companies in the sector. It has been listed on the main segment of the SIX Swiss Exchange since September 2008. Edisun Power has achieved continuous growth in recent years and today enjoys considerable experience in both national and international projects. The company operates solar power plants in Switzerland, Germany, Spain and France, where additional facilities are currently under construction.
